Education

- 2019 – present ♦ **Ph.D. student**, Computer Science & Engineering, University of Washington.
Advisor: Linda Shapiro
- 2019 – 2021 ♦ **M.S.**, Computer Science & Engineering, University of Washington.
Overall GPA: 3.87/4.0
- 2015 – 2019 ♦ **B.Eng.**, Electronic Engineering, Tsinghua University.
Overall GPA: 3.73/4.0 (Rank 20/216)

Publications

- 1 Nofallah, S., Shapiro, L. G., Wu, W., **Liu, K.**, Ghezloo, F., & Elmore, J. (n.d.). Automated analysis of whole slide digital skin biopsy images. *Frontiers in Artificial Intelligence*, 209.
- 2 **Liu, K.**, Mokhtari, M., Li, B., Nofallah, S., May, C., Chang, O., ... Shapiro, L. (2021). Learning melanocytic proliferation segmentation in histopathology images from imperfect annotations. In *Proceedings of the IEEE/CVF conference on computer vision and pattern recognition* (pp. 3766–3775).
- 3 Zong, Z., Feng, J., **Liu, K.**, Shi, H., & Li, Y. (2019). Deepdpm: Dynamic population mapping via deep neural network. In *Proceedings of the AAAI conference on artificial intelligence* (Vol. 33, pp. 1294–1301).

Research Experience

Ongoing Research

- 2022.6 – present ♦ **Low-light Portrait Enhancement on Mobile Devices**
Sensebrain Technology, Advisor: Inchang Choi, Ruiwen Zhen, Jinwei Gu
Propose a degradation pipeline for Bayer images. Train computer vision and artificial intelligence models to enhance low-light portrait images in Bayer and RGB formats. Integrate the models to mobile device camera pipeline.
- 2019.7 – present ♦ **Applying AI to Assess Histologic Features to Improve Melanoma Diagnosis**
Paul G. Allen School of Computer Science and Engineering, Advisor: Linda Shapiro
In-depth knowledge in deep learning (DL) and statistical machine learning (ML). Expertise in delivering ML technologies and image processing skills in curating medical image dataset based on domain knowledge. Three year experience working with researchers from multiple disciplines. Held weekly meetings on building efficient data annotation protocols and improving dataset quality. I'm currently pursuing 3 directions:
- **Melanocyte Detection in Skin Histopathological Images:** Propose a GAN-based detection model for virtual staining on whole slide images to detect melanocytes. (Submitted to WACV2023)
 - **Segmenting Melanocytic Proliferations on Skin Biopsy Images:** Propose a melanocytic proliferation segmentation framework by leveraging noisy and sparse labels. Achieved state-of-the-art performance on this specific task. [\[paper\]](#)^[1]
 - **Graph-based Learning in Melanoma Diagnosis:** Build hierarchical cell-to-tissue graph using melanocytes and non-melanocytes features. Train a graph convolutional network to learn melanoma diagnosis. (Ongoing)

Research Experience (continued)

Previous Research

- 2020.7 – 2020.9 ◇ **Sedeen Viewer Plugins for Cancer Diagnosis**
Paul G. Allen School of Computer Science and Engineering, Advisor: Linda Shapiro
Built plugins in Sedeen Viewer, a whole slide image viewer, for cancer diagnosis. The backend and frontend are Python and C++ respectively. [\[website\]](#) [\[github\]](#)
- 2018.11 – 2019.5 ◇ **Unsupervised Multimodal MRI Segmentation of Stroke Lesion**
MMDP Lab, Advisor: Weibei Dou
Proposed an unsupervised segmentation method based on multimodal brain magnetic resonance images (MRI) of chronic stroke patients to segment stroke lesions including both ischemic and chronic stroke.
- 2018.7 – 2018.9 ◇ **Coronary Calcium Segmentation on Dual Energy CT Images**
The Li Laboratory at Cedars-Sinai and UCLA, Advisor: Debiao Li, and Yibin Xie
Worked on the segmentation and sub-voxel resolution algorithms to extract coronary calcified plaques in dual-energy CT images.
- 2017.11 – 2018.7 ◇ **DeepDPM: Dynamic Population Mapping via Deep Neural Network**
The FIB Lab at Tsinghua University, Advisor: Yong Li
Proposed the idea to generate dynamic population distributions in full-time series. Designed DeepDPM, an overall model that describes both spatial and temporal patterns based on coarse data and point of interest information. [\[paper\]](#)^[2]

Teaching Experience

- 2021 ◇ **CSE 576 Computer Vision**, TA, University of Washington, Seattle

Academic Service

- 2022 ◇ **Reviewer.**, IEEE/CVF Winter Conference on Applications of Computer Vision (WACV)

Awards

- 2019 ◇ **Excellent Honors Graduate**, Tsinghua University.
- 2018 ◇ **Outstanding Student Award**, Electronic Engineering, Tsinghua University.
◇ **ICBC Scholarship**, Industrial and Commercial Bank of China.
- 2017 ◇ **Jiang Nanxiang Scholarship**, Tsinghua University.
- 2016 ◇ **National Scholarship**, the government of China.

Skills

- Languages ◇ English, Mandarin Chinese.
- Programing ◇ Python, C/C++, MATLAB, shell scripts, JavaScript, R, Verilog
- Technology ◇ PyTorch, LaTeX, Tensorflow, OpenCV
- Relevant Coursework ◇ Computer Vision, Deep Learning, Image Processing, Data Visualization, Statistical Learning, Data Structure, Stochastic Modeling, Machine Learning, Probability, Linear Algebra, Calculus.
